I hereby submit the report of the Surgeon of Police for the year ending, December 31, 1925.

During the year, thirteen members of the department have died. All of these deaths were the result of disease. None were killed in the performance of duty or died as a result of such injury.

Seventeen men of various rank were retired on pension. Fifteen of these were granted service pensions after twenty five or more years of active service. Two, only, Patrolman Sylvester A. Bauman and Lineman Lewis A. Bruce, were retired as a result of disability due to disease after a comparatively short service.

The work of the Surgeon of Police has been lightened by the appointment of an Assistant Surgeon. The city has been divided into two districts, north and south by Genesee Street, thus relieving each man of the long trips required to cover the entire city. Early in January, 1925, Dr. James P. Barr was given a temporary appointment. On account of illness, he did not assume his duties until ~~August~~ April 15th, the entire city being covered by the Surgeon. He served until August 1st., when Dr. Victor A. Tyrasinski was appointed after a competitive Civil Service examination, and took over the work done by Dr. Barr.

During the year, a total of 13,431 days lost time as a result of illness and injury in the department existed. Of this number, 10,781 days were lost from illness, 1997 days from injury received while on duty, 653 days from injury received while off duty. A total of 3,742 calls by the Surgeon and the Assistant Surgeons were made in caring for them. Figured on a total numerical strength of 1126 members of the department, 11.9 days per member were lost.

In addition to caring for sick and injured men, the Surgeon has done the other work incidental to the position, attended other members not actually on the sick roll, made examinations for appointment and retirement, attended persons confined in station houses, made examinations and given medical advice concerning cases of arrest having a medical aspect; inspected station houses; kept records and done clerical work incident to the position.

It has been customary to treat injured prisoners, requiring hospital care, in the various public hospitals of the city. This has necessitated the assignment of patrolmen to these hospitals to guard these men. I would suggest that where ever possible such prisoners be transferred to the City Hospital, a portion of which is securely barred and locked, thus doing away with the necessity of constant special guards for each prisoner.

Respectfully submitted,

Edwin A. Bowerman,

Surgeon of Police.

### Motorcycles

There are 36 motorcycles in use by the Motorcycle Squad, 18 of which are assigned to the east side and 18 to the West side of the City.

### Bicycles

There are 17 bicycles in use by the department, one bicycle to each of the 16 precincts, with the exceptions of the Tenth Precinct, to which two bicycles are assigned.

### Garage

At No. 1 Garage we have a fully equipped repair shop to which five mechanics are attached to take care of the overhauling and repairing of automobiles, and one mechanic to take care of the overhauling and repairing of motorcycles. This repair shop results in considerable saving of time and money to the department as it obviates the necessity of sending automobile and motorcycles to private repair shops for this work.

### Horses.

There are 30 horses in the department, all of which are kept at the Headquarters Mounted Barn, and used in the down-town precincts for use in mounted patrol and Traffic work.

Respectfully,

Henry W. Alt,

Supt. of Motive Power & Supplies.

## REPORT OF THE ELECTRICAL BUREAU.

During the year 1925 the Electrical Bureau was called upon to install and maintain additional electrically operated equipment in addition to the maintenance of the various types of signal systems in operation, including the patrol signal system, operating in eleven precincts; flashlight system in five precincts, telegraph system connecting the sixteen precinct stations with police headquarters, fire alarm signal operating in sixteen precincts and police headquarters, bank and pawnshop signal system connecting the downtown banks and pawnshops with police headquarters; twelve individual bank alarm circuits connected to their respective precincts and private telephone system connecting all precinct stations, auto patrol houses and officials of the police department.

The contract for installing the underground conduits and traffic signal standards for the proposed traffic control system was completed in Delaware Avenue, from Upper Terrace to Allen Street.

Two new precincts, Nos 15 and 16, were established and the patrol signal systems were installed in each precinct.

Nine additional patrol boxes were installed and four that were damaged were replaced.

Forty four street intersections were equipped with automatic traffic control signals, consisting of fifteen center type and twenty nine bracket type, mounted on poles at the curb line. The maintenance of the center type is considerable higher than on the bracket type.

Installed traffic control signals at eleven street intersections as follows, two are isolated type, nine bracket type, two on diagonal corners, four isolated type signals replaced with bracket type signals. Thirty one isolated signals were hit and damaged to such an extent that twenty five were taken to shop for repairs, two bracket type were struck and slightly damaged. Traffic signal at Broadway and Fillmore and Colvin and Hertel are operating the two section signals, "Stop and Go," Omitting the caution signal, this type of signal clears the intersection of the street at every cycle and they are considered very efficient.

Contract for installing the flashlight signal system in Second, Fourth, Fifth and Sixth Precincts was awarded, leaving seven precincts operating the patrol signals, which has been in constant operation for thirty seven years and which are in a worn out condition, requiring considerable attention. This system should be replaced with the Flashlight Signal system at an early date.

The auto trucks of this bureau have been in operation for three, four, and five years respectively, requiring considerable attention, to keep in running order, and they should be replaced with new auto trucks.
